#### Optical Transceiver: DWDM-1.25G-SFP-120-XX

#### Product Description:

DWDM-1.25G-SFP-120-XX is Multi-Vendor MSA Compatible 1.25G DWDM SFP multi-rate (1.063-1.25Gbps) transceiver designed for operation over Double Single-Mode Fiber (SMF) optical cable in Transmission network environments for inter-connection of metro long haul links. DWDM-1.25G-SFP-120-XX transceiver has a guaranteed optical budget of 32 dB, which in most cases is enough to reach up to 120 kilometer distance. Distance is just an indicative parameter for comfort of identifica-tion that is calculated by taking into account minimal optical budget and average attenuation of optical cabling in industry. On the transmission side 1.25G DWDM SFP module converts a 1.25Gbps NRZ electrical signal into a 1.25Gbps optical signal on a specific wavelength and reversely at the receiver side 1.25Gbps optical signal is converted into 1.25Gbps NRZ electrical signal. DWDM-1.25G-SFP-120-XX 1.25G DWDM SFP transceiver has a fixed laser with 45 channel support from the ITU-T 100GHz DWDM Channel Grid, more specifically Channel 17 to Channel 61 (191.7~196.1 THz) are supported, which need to be speci-fied when ordering.

## Product Data Sheet

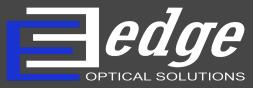

Fixed wavelength 1.25G DWDM SFP Module has DDM/DOM optical diagnostics functionality, which provides real time access to device operating parameters, control and status registers as specified in SFF-8472. DWDM-1.25G-SFP-120-XX operates in standard 0° to 70°C temperature range and has a Double LC interface. This SFP module supports 1.063-1.25Gbps data rate and such applications as Gigabit Ethernet (1.25 Gbps), 1G Fiber Channel (1.0625 Gbps).

This fixed wavelength 1.25G DWDM SFP Module is CE/RoHS certified and it is Compliant with product safety standards. 1.25 DWDM SFP Transceiver is fully compliant to SFP Multi Source Agreement. Consequently, it means that module is compatible with 80% of networking equipment, where is not implemented a special algorithm for protection against third party modules. However – we can provide an SFP transceiver with custom-encoded firmware in order to make it work in almost any base station manufacturers equipment. Therefore, we will be glad to know your requirements – Contact us.
