Fiber Optic Patch Cable: LC-LC-OM4-UPC-DX-A

Product Description:

LC-LC-OM4-UPC-DX-A is LC to LC Male, OM4 Multimode, 2 Fiber, Type A to A cable available in length from 1 meter to 50 meters. This LC to LC cable use 50/125 micron Multimode fiber with cable jacket diameter of 2 mm. Cable jacket material is available in two options - Low Smoke Zero Halogen (LSZH) or Optical Fiber Nonconductive Plenum (OFNP). The LSZH cable jacket ensures lower smoke and zero smoke characteristics, but OFNP cables have fire-resistance and low smoke characteristics. OFNP is the highest fire rating fiber cable and no other cable types can be used as substitutes. LC to LC cable supports 850nm and 1310nm wavelengths, and it's attenuation at 850nm is 2.5dB/km and at 1310nm is 0.6dB/km which ensures best performance at short distances. LC to LC cable guarantees the best standard grade insertion loss which is below 0.3dB. Operating temperature is rated to -20C to +70C which suits wide range of environments. LC-LC-OM4-UPC-DX-A LC to LC cable is manufactured with Type A to A crossover configuration to support transceiver to patch panel connections.

LC-LC-OM4-UPC-DX-A patch cable is CE/RoHS certified and is compliant with product safety standards. LC to LC cable is fully compliant to ISO/IEC-61754, EN 50399 and EN 50575 specification. Consequently, compliance to above standards guarantees that LC to LC cable is intermateable with other manufacturer equipment (cables, cassettes, adapters). And as well ensures that cable jacket fully meets its material properties.
